

IBM developerWorks Opens Linux Security Spaces

Linux Security Spaces is a micro-site focused on issues and development activity of interest to the Linux Security community. You can embed these spaces into a Google Gadget, Netvibes module, or a Widget for your iGoogle. Topics include: Auditing, intrusion detection systems, firewalls, virus scanning, and other topics and Linux security tools; NMap, Snort, Chkrootkit, Rootkit Hunter, and AppArmor. The community leader is Mayank Sharma, a contributing editor at SecurityWeek.
