

## Gigabyte AirCruiser N300 802.11n

We have looked at many Gigabyte motherboards and graphics cards at Phoronix maintains products in the mobile and communication sectors with such products as Ultra Mobile PCs, wireless routers, and 802.11b/g/n wireless modules. Today we review a wireless product as we review the AirCruiser N300, which is a MiniPCI 802.11n adapter that uses the Ralink RT2860 chipset, and in this review we'll tell you how to use the ndiswrapper on Ubuntu 8.04.
