

Install OpenSolaris 2008/05 DomU at Ubuntu 8.04 Dom0 (both 64-bit)

Instructions mentioned bellow in general follow up the ones in my previous post at Xen 3.2.1 CentOS 5.1 Dom0 (64-bit). However, Xen 3.2.1 Dom0 had been obtained by cloning Mercurial Repository@xensource.com. Install Xen on Ubuntu Repositories and the patched as usual.
